We have been able to create the most accurate data model using the best players of past and present. This includes International and Domestic cricket. The data model is based on the most commonly used metric for the last 15 years and will be continually updated. In the near future we will add more data into the platform such as individual records, batting averages, bowling averages, hundreds, double hundreds, century makers, partnerships, dismissals and wickets by type. In our platform, you will be able to find out the most accurate information about the player including his performance statistics, player information, rankings and much more. Key Features • The platform will use the most accurate and comprehensive data model, including International and Domestic cricket, using the best players of past and present. • The database will be updated regularly and information such as innings/match details, player information, player records, average, dismissals, records, international match details and much more will be added. • The platform will contain all the information in a clean and user friendly format. • The platform will include record details, player rankings, BBL Player Tracker, National, State and Regional Information, international performances, including individual records and stats, player profiles, top performers of the year etc. • The database can be accessed at any time and anywhere, irrespective of the time zone, language, connection etc. • The website will have special features like League Engagement, video, statistics, match highlights and commentary. • The platform can be used on any device. References Category:Cricket websites Category:Sport websites'India will become 5th largest nuclear power by 2025' New Delhi, Aug. 15 (ANI): India will become the fifth largest nuclear power in the world by 2025 and the country is on track to meet the first target of the global initiative of the international community to reduce the global nuclear threat, according to a leading German technology magazine. Nuklearpower.de, in an article, said that India is one of the fastest growing nuclear power countries in the world and has the highest number of nuclear reactors. Nuklearpower.de spoke to several Indian experts and commented on their view about the country's nuclear plans, according to the article. R. Jagannathan, a Delhi-based nuclear scientist, said, "The number of people who speak about the risks of nuclear power in India are not very many compared to the overall number of people who 82157476af
